

WILTON RAIL STATION AREA VISION

ROUTE

Transportation and
Land Use Study

In the future, the Wilton Train Station area will be aesthetically appealing with clustered activity that complements and is well connected to Wilton Center. A system of sidewalks and paths will be in place to allow pedestrians to cross the roads safely. There will be effective connections to a system of regular transit service that will take residents, visitors, and commuters alike to and from Wilton Center and businesses on Route 7 throughout Wilton. The future Wilton Train Station site design will include additional uses on site, and will respect the beauty of the Norwalk River.

What we heard...

Wilton Rail Station needs:

- To support the vision for Wilton Center from the Plan of Conservation and Development
- Connections to the rest of town and communities
- Safety for pedestrians
- More prominent signage
- More and well-designed parking
- Mix of uses on site with convenience-type retail for commuters
- To respect, complement recreational use and preserve the Norwalk River and its environment
- Better connections to Merwin Meadows Park

Wilton Rail Station Assets and Challenges

Assets

- New-improved intersection/ traffic flow at Station Road and Route 7
- Proximity to Route 7 and Wilton Center
- Norwalk River

Challenges

- Isolated area
- Aesthetics
- No commuter services or development now on station site
- Lack of connections
- Pedestrian safety
- Access for pedestrians and bicyclists
- Crossing Norwalk River, Route 7, and Wolfpit Road
